Licenses are available
for just \$75 online.

Read and Write Images	Draw Text on Images
Draw new Images	Watermark Images
Resize Images	Control Image
Find Image Dimensions	Compression Quality
	Over 80 Functions

The Alagad Image Component is a 100% native ColdFusion
Component used to create and manipulate image files.
Written entirely in ColdFusion CFML, the Image
Component does not require installation of any
additional software. The Image
Component is not a CFX tag and is
not Platform dependant.
